# Lucas **Romero Fernández**

Physicist

**About me**

A hard-working, kind and diligent person with a strong sense of duty since childhood, who always seeks self-improvement and continuous learning day after day. Even if sometimes this attitude can demand too much of me, I always strive to overcome adversity and find success with perseverance, effort and teamwork. At the moment, seeking to become a PhD student to train in the research sector in an area related to my interests.

**Personal**

Balearic Islands, Spain

**Areas of specialization**

• Physics • Astrophysics • Solar Physics • Mathematics • Programming

**Programming languages**

- Python
- LaTeX
- Wolfram
- Julia
- MATLAB
- R
- HTML
- CSS

**Interests**

Solar physics, research, Python programming, numerical simulations, numerical solutions of equations, data analysis and management, continuous training, and learning.

## Education

2024-2025

**Master's Degree in Advanced Physics and Applied Mathematics**
Universitat de les Illes Balears · Majorca, Balearic Islands
Advanced training for the Physics Degree, directed towards research, although with nuances focused on the professional field. Specialized in astrophysics and relativity, including plasma and solar physics (especially, magnetohydrodynamics) and computational analysis. The master's thesis (with possibilities of turning into an article in the future), which can be found on my website, centered around dissipative torsional Alfvén waves in solar photospheric flux tubes, where I obtained a final mark of 9.0/10. Final grade of the degree: 8.98/10.

2019-2024

**Bachelor of Science in Physics**
Universitat de les Illes Balears · Majorca, Balearic Islands
Degree where the user has developed a background of essential concepts in the field of physics with specialization in relativity and astrophysics, with practical implementations through computational physics and programming. The final degree project, which can be found on my website, centered around the resonant attenuation of radial harmonics of magnetohydrodynamic kink modes waves in the solar corona, where I obtained a final mark of 9.3/10. Final grade of the degree: 6.77/10.

2017-2019

**Baccalaureate**
IES Ses Estacions · Majorca, Balearic Islands
Science modality finished with a top-of-the-class final grade of 9.16/10 (High Honors).

2013-2017

**Compulsory Secondary Education**
Es Liceu · Majorca, Balearic Islands
Scientific-focused education that concluded with a final grade of 8.83/10. For that reason, I was awarded a special recognition by the local government of the Balearic Islands.

## Work Experience

2025-Present

**School Support Teacher**
Part-time · EducaMente Baleares
My responsibilities in this role include: Provide tutoring in various subjects, tailored to the students' level (mostly Compulsory Secondary Education or Baccalaureate) and pace, design and prepare personalized activities and exercises, monitor student progress and report it to their families, and collaborate with the team to continuously improve our teaching methods.

## Certificates & Recognitions

2017 Special acknowledgment for the academic trajectory and study commitment in Compulsory Secondary Education.

## Languages

| | | |
|---|---|---|
| **English** | B2 | With certification that encompasses all macro skills. |
| | C1 | Currently studying. |
| **Spanish** | Native | Mother tongue. |
| **Catalan** | C1 | With certification that encompasses all macro skills. |

## Transversal Skills

- Learning and knowledge utilization.
- Planning, organization and concern for order and quality.
- Networking.
- Communication, teamwork and cooperation.
- Analytical, conceptual and critical thinking.
- Initiative.
